

Water Hygiene Legionella responsible person

Our specialist **water hygiene** courses cover all the latest and most relevant standards and guidance, including **HTM 04-01, ACoP L8 and HSG 274**.

Is this course for you?

This course is for Responsible Persons working within the area of water safety. As well as Legionella, it considers the management of other hazards and risks too.

In addition to the roles and responsibilities for maintaining safe water systems, this course will develop your ability to assess your organisation's current level of compliance and exposure to risks and give you the knowledge and skills to take action to improve compliance and reduce risks.

Based around the core elements of compliance, the course uses an audit tool based on guidance from the HSE to examine in a practical and structured fashion the requirements to achieve compliance.

Course aim

To provide an understanding of the importance of managing water hygiene related risks, roles, responsibility and liabilities, and of the use of important techniques such as development of an adequate risk assessment, risk minimisation schemes, monitoring and audit in order to achieve compliance.

Objectives

- Describe Legionella, its requirements and how to control it.
- Explain how to discharge their roles and responsibilities and the required appointments.
- Describe and explain the legal requirements including the duty to manage Legionella.
- Identify the elements of a suitable and sufficient risk assessment.
- Describe the concept of a suitable written scheme of control.
- Identify the elements of a suitable and sufficient records and monitoring.
