

SOUTHAMPTON GENERAL HOSPITAL SGH - ONCOLOGY WARD EXPANSION

- The project involved constructing a 5-storey structure (Levels B-F) on top of an existing single-storey building (Level A), which remained operational throughout
- Level B expanded the Ophthalmology department with 40 new spaces, including clinic rooms, imaging rooms, and a large waiting area
- Level C added 27 beds to the Oncology department, while Level D added 24 more beds with staff facilities
- Level E became a general ward with renal and dialysis equipment, and Level F housed a plant room and extended stair cores
- Extensive drainage connections were completed in eight phases, and new wards were fully fitted out while ensuring safety for staff and patients

£22.5m

“Utmost thanks to the team for the phenomenal hard work, getting things organised and set up so efficiently against such incredibly tight timelines and opening a day ahead of the original target date. Thank you to LST Projects for their efficiency and adaptability in accommodating modifications along the way. From a clinical perspective we are very grateful to have a brand new facilities for patient care.”
